

**INCIDENT MANAGEMENT SITUATION REPORT**  
**SATURDAY AUGUST 2, 2003 - 0800 MDT**  
**NATIONAL PREPAREDNESS LEVEL 5**

**CURRENT SITUATION:**

Initial attack activity nationwide was light. Nationally, 213 new fires were reported. Six new large fires were reported, one each in the Eastern Great Basin, Rocky Mountain and Northern California Areas and three in Northern Rockies Area. Three large fires were contained, one each in the Northwest, Northern California and Southern Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, New York, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington and Wyoming.

**NORTHERN ROCKIES AREA LARGE FIRES:**

An Area Command Team (Mann) is assigned to manage the Wedge Canyon, Robert, Trapper Creek Complex and Ross Creek fires on the Flathead and Kootenai National Forests, and the Glacier National Park.

ROBERT, Flathead National Forest. A unified command between a Type 1 Incident Management Team (Stam) and Flathead County is in place. This fire is in timber, 8 miles north of Columbia Falls, MT. Light upslope winds spread the fire up slope. Crews continued burn out operations on the southeast and west flanks. The fire remains a major threat to communities along the North and Middle Fork drainages of the Flathead River and the communities within Glacier National Park. Evacuations have been implemented in West Glacier, Lake Five and Glacier National Park Headquarters. Structure protection is in place for 200 residences and 24 commercial properties.

WEDGE CANYON, Flathead National Forest. A Type 1 Incident Management Team (Bennett) is assigned. This fire is in sub-alpine fir with down fuels, 20 miles east of Eureka, MT. Conditions for extreme fire behavior are in place with very dry fuels and hot, dry weather. Fire activity increased on the southeast side of the fire with short duration runs, torching and spotting. Evacuations remain in effect from Moose Creek to the Canadian border. Structure protection is in place for 100 residences.

TRAPPER CREEK COMPLEX, Glacier National Park. A Type 1 Incident Management Team (Raley) is assigned. This complex, comprised of Trapper Creek, Wolf Gun and Paul Bunyan fires, is in mixed conifer with dead and down fuels, 45 miles northeast of Kalispell, MT. Both the Trapper Creek and the Wolf Gun fires are burning through old burns. Torching, spotting and short interior crowning runs were observed. The Trapper Creek fire is moving to the south and east and the Wolf Gun fire is moving to the northeast and southwest. Meetings are being held to coordinate with Canadian Park Service, the Glacier National Park and the Blackfoot Tribe. The major road through Glacier National Park (Going to the Sun Highway) has been closed west to Logan Pass, and is open from Logan Pass, east. Smoke continues to impact Glacier National Park, Waterton Lakes National Park, and Lethbridge, Alberta, Canada. Structure protection is in place for three commercial properties.

ROSS CREEK, Kootenai National Forest. A Type 2 Incident Management Team (Sandman) is assigned. This fire is in sub-alpine fir with tall brush and heavy down fuel loads, 20 miles southwest of Troy, MT. Smoldering with single tree torching was observed. The Ross Creek Trail remains closed.

TOBOGGAN, Idaho Panhandle National Forest. A Type 2 Incident Management Team (Gray) is assigned. This fire is 12 miles northeast of Wallace, ID. Torching and short range spotting were observed. Structure protection is in place for 48 residence and 12 commercial properties.

SLIMS, Nez Perce National Forest. A Type 1 Incident Management Team (Mortier) is assigned. This fire is in ponderosa pine and mixed conifer, 35 miles east of Grangeville, ID. Individual and group torching along with short crown runs on the east and south flanks were observed.

TREASURE COUNTY COMPLEX, Southern Land Office, Montana Department of Natural Resources and Conservation. This complex is comprised of the Johnny, Earl and Stracks' fires. These fires are in ponderosa pine, down and dead fuels, sagebrush and grass, eight miles south of Hysham, MT. Extreme fire behavior with major runs was observed on all the fires. Structure protection is in place for 15 residences and two commercial properties.

HUNT CREEK FIRE, Priest Lake Area Office, Idaho Department of Lands. A Type 2 Incident Management Team (Kechter) is assigned. This fire is in heavy, cured logging slash, eight miles northwest of Coolin, ID. Active ground fire with single tree torching in the interior was observed.

BLACK FROG COMPLEX, Bitterroot National Forest. A Type 1 Incident Management Team (Frye) is assigned. This complex, comprised of the Blackwall and Frog Pond fires, is 34 miles south of Hamilton, MT. High temperatures, lower relative humidity and increased winds have resulted in increased fire behavior on both fires. Individual and group torching was common resulting in short range spotting and increased fire activity in ground fuels. Crews continue to make excellent progress on both fires. Structure protection is in place for 87 residences and nine commercial properties. Evacuations from Moose Meadows remain in place. Highway 93 is open to piloted public vehicles from 0800 to 2000. Highway 43 is open from Lost Trail Pass, east. Reduction in acreage is due to more accurate mapping.

HIDDEN LAKE, Beaverhead/Deerlodge National Forest. A transfer of command from Chrisman's Type 2 Incident Management Team to a Type 3 organization will take place today. This fire is in sub-alpine fire, four miles northeast of Polaris, MT. The eastern front of the fire was active in the afternoon; all other areas of the fire were experiencing smoldering and isolated activity.

BIG CREEK, Bitterroot National Forest. This fire is in timber, four miles northwest of Victor, MT. Creeping fire with occasional torching was observed.

BOOTH, Southern Land Office, Montana Department of Natural Resources and Conservation. This fire is in grass and timber, 17 miles south of Colstrip, MT.

BAILEY, Eastern Land Office, Montana Department of Natural Resources and Conservation. This fire is in grass, sagebrush and timber, 12 miles southwest of Colstrip, MT.

### EASTERN GREAT BASIN AREA LARGE FIRES:

CENTERVILLE FIRE, Northwest State, Utah State Division of Forestry Fire & State Lands. A Type 2 Incident Management Team (Broyles) is assigned. This fire is in very heavy scrub oak, grass, sub-alpine fir and bug kill timber, at the north end of Centerville, UT. Creeping fire on south facing slopes and some torching were observed. Structure protection is in place for 100 residences.

HOT CREEK, Boise National Forest. A Type 1 Incident Management Team (Sexton) is assigned. This fire is in mixed conifer with heavy fuel loading, three miles west of Atlanta, ID. Running, torching, crowning and spotting were observed. The fire has spread to the west side of Snyder Creek and spotted into the Queens Creek drainage. Evacuations of isolated summer cabins and campers remain in effect. Structure protection is in place for 80 residences and ten commercial properties. Increase in acreage is due to more accurate mapping.

NORTH FORK LICK, Payette National Forest. A Type 2 Incident Management Team (Brunner) is assigned. This fire is in sub-alpine fir with dead and down fuels, 18 miles northeast of McCall, ID. Group torching with spotting 100 to 200 yards ahead of the fire was observed.

JOE HATCH, Moab Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Suwyn) is assigned. This fire is in Douglas fir and mountain brush, 25 miles north of Green River, UT. Down slope creeping into the left fork of Big Canyon was observed. The fire is in extremely rugged and inaccessible terrain.

CRYSTAL CREEK, Salmon-Challis National Forest. This fire is in sub-alpine fir, brush and grass, 18 miles north/northwest of Stanley, ID. Minimal fire behavior was observed.

LOST PACKER COMPLEX, Salmon-Challis National Forest. This fire is 36 miles northwest of Salmon, ID. Short-range spotting and group torching were observed in sub-alpine fir, mixed conifer and grass.

### NORTHWEST AREA LARGE FIRES:

FAWN PEAK COMPLEX, Okanogan-Wenatchee National Forest. A Type 1 Incident Management Team (Anderson) and a Washington Interagency Incident Management Team (Furlong/Gormley) are assigned. This complex is comprised of the Fawn Peak, Sweetgrass and Farewell fires. The Farewell fire is in sub-alpine fir with heavy dead and down timber, 13 miles northwest of Winthrop, WA. Upslope runs with spotting and torching were observed. The fire continues to spread north and northwest into the Ashnola River and Spanish Creek drainages. The fire is within four miles of the Canadian border.

KELSAY COMPLEX, Umpqua National Forest. A Type 2 Incident Management Team (Hoff) is assigned. This complex, comprised of the Kelsay, Bear Creek and 230 fires. Fuels involved are hemlock, lodgepole pine and huckleberry brush with heavy dead and down fuels, 47 miles northeast of Roseburg, OR. Minimal fire behavior with occasional torching was observed.

CLARK, Willamette National Forest. A Type 2 Incident Management Team (Morcom) is assigned. This fire is in timber with dead and down fuels, ten miles northeast of Lowell, OR. Minimal fire behavior was observed.

FROG HOLLOW, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Thorpe) is assigned. This fire is in heavy timber and ground fuels, eight miles northeast of Mitchell, OR. Minimal fire activity with occasional flare-ups in the unburned interior was observed.

### ROCKY MOUNTAIN AREA LARGE FIRES:

LANGLAS DRAW, White River National Forest. This fire is in fir, ponderosa pine, aspen and oak brush, 25 miles southeast of Meeker, CO. Interior torching and short ground runs were observed. Structure protection is in place for 15 residences.

BIG SPRING, Casper Field Office (East Zone), Bureau of Land Management. This fire is in ponderosa pine, pinyon pine and juniper, 20 miles southwest of Buffalo, WY. Torching was observed.

BALCONY HOUSE COMPLEX, Mesa Verde National Park. This complex, comprised of Moccasin, White, Balcony and Park fires, is in pinyon pine, juniper, ponderosa pine, Douglas fir, grass and brush, 10 miles southeast of Cortez, CO. Minimal fire behavior was observed. Fires within the complex are being monitored.

RED CREEK 3, Casper Field Office (East Zone), Bureau of Land Management. This fire is 12 miles south of Casper, WY. Backing and smoldering were observed in ponderosa pine, grass and down timber.

### NORTHERN CALIFORNIA AREA LARGE FIRES:

EAST BAY COMPLEX, Santa Clara Unit, California Department of Forestry & Fire Protection. This complex, comprised of five fires is in oak woodland, eight miles southwest of Tracy, CA. No new information was reported.

BARBER, Northern California District, Bureau of Land Management. A Type 2 Incident Management Team (Szczepanik) is assigned. This fire is in sage, grass and timber, 5 miles south of Eagleville, CA. Residual burning of heavier fuels in the interior was observed. Two outbuildings have been confirmed lost.

### SOUTHWEST AREA LARGE FIRES:

GRANITE, Gila National Forest. This fire is in mixed conifer, ponderosa pine, grass and oak, 13 miles northwest of Hillsboro, NM. No new information was received. This will be the last report unless new information is received.

BLUE RIVER COMPLEX, Apache-Sitgreaves National Forest. This complex, comprised of the Steeple, Largo and Thomas fires, is in ponderosa pine, mixed conifer, pinyon pine, brush and grass, 18 miles south of Alpine, AZ. Gusty winds from thunder cells remain a concern. These fires is in monitor status.

SPRUCE COMPLEX, Gila National Forest. This complex, composed of the Spruce, Silver, Nabours, Parallel, Sacaton, Rain, and House fires are in brush, ponderosa pine and mixed conifer, 18 to 20 miles east, southeast and northeast of Glenwood, NM. The complex received rain yesterday.

## OUTLOOK:

**Fire Weather Watch:** For isolated dry thunderstorms in southern portions of the Idaho Panhandle and the mountains of southwest Montana.

**Weather Discussion:** High pressure will continue to sit over the Southwest today, while moisture spreads from California over the border into southern Oregon, Idaho and western Montana. The moisture is expected to produce more thunderstorm activity over these areas during the afternoon. Breezy conditions and low relative humidity are also expected over central Oregon, northern Washington and western parts of Montana. Monsoon moisture continues to flow through California, Arizona, northern New Mexico and Colorado, where mainly wet thunderstorms are expected. The Great Basin will see scattered thunderstorms for another day, while southeast Oklahoma may experience a round of severe thunderstorms as a front passes through the region.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>EASTERN GREAT BASIN AREA</b> Partly cloudy with scattered afternoon thunderstorms region wide.	Idaho, Bridger-Teton: 73 to 90 mountains, 80 to 96 valleys. Utah and Arizona Strip: 75 to 89 higher elevations, 86 to 96 valleys.	Idaho, Bridger-Teton: 12 to 30% mountains, 9 to 25% valleys. Utah, Arizona Strip: 19 to 41% mountains, 15 to 25% valleys.	Upslope or southwest 5 to 15 mph in Idaho and Bridger-Teton, south 5 to 10 mph in northern Utah, southwest 10 to 15 mph in southern Utah. Gusty near storms.
<b>NORTHERN CALIFORNIA AREA</b> Partly to mostly cloudy with some afternoon and evening showers and thunderstorms over the mountains. Areas of fog and low clouds along the coast.	60s and 70s near the coast, and 80s to mid 90s inland.	20 to 40%	Mostly south to northwest at 5 to 15 mph. Local areas in the afternoon gusting to 20 mph, mainly in the northeastern areas.
<b>NORTHERN ROCKIES AREA</b> Isolated to scattered mainly dry thunderstorms over the southern half of the Idaho panhandle and the southern mountains of Montana, east and west of the Divide.	Idaho: 90 to 105 Montana: 85 to 95 North Dakota: 80s	Idaho: 15 to 25% Montana: 15 to 25% North Dakota: 25 to 40%	Idaho: southwest 5 to 15 mph Montana: southwest-northwest 5 to 15 mph North Dakota: north 5 to 10 mph
<b>NORTHWEST AREA</b> Variable cloudiness. Chance scattered thunderstorms in eastern Oregon and southern Oregon Cascades.	Mostly 80s and 90s with some upper 70s in western Washington.	Generally 30 to 45% west of the Cascades, 20 to 30% in central Washington/Oregon and 10 to 20% eastern sections.	Generally west to northwest 5 to 12 mph except locally to 15 to 18 mph in parts of eastern Washington and north central Oregon.
<b>ROCKY MOUNTAIN AREA</b> Becoming partly cloudy. Scattered thunderstorms over Colorado, isolated elsewhere. A few storms could be dry over western Wyoming.	85 to 95 lower elevations, 70s in the mountains.	14 to 20% western northwest Colorado, and southwest Wyoming. 20 to 30% elsewhere.	Variable 5 to 15 mph.
<b>SOUTHWEST AREA</b> Partly cloudy. Widely scattered thunderstorms, most numerous central Arizona, northern New Mexico and mountains.	70s and 80s mountains, 90s to near 105 lower elevations.	20 to 30%, except 10 to 20% parts of south central New Mexico, southern New Mexico, and western Arizona.	Variable to upslope 5 to 15 mph, except east to southeast 10 to 20 mph across western Texas and southern New Mexico.

<b>WESTERN GREAT BASIN AREA</b> Partly to mostly cloudy and cooler with isolated to scattered mostly wet thunderstorms across the state.	80s in low elevations, mid 60s to 70s mountains, low 90s southern deserts.	22 to 40% at lower elevations, 30 to 45% in upper elevations, 50 to 70% Sierra Nevadas.	South to southwest 5 to 15 mph.
<b>SOUTHERN CALIFORNIA AREA</b> A few thundershowers over the Sierra, Inyo National Forests, and the southern California mountains east of Cajon pass. Morning coastal fog. Otherwise sunny.	70 to 80 coastal areas. 75 to 90 mountains. 80 to 100 valleys. 85 to 100 upper desert. 95 to 110 low desert.	25-40% deserts. 30-45% mountains. 30-45% valleys.	Southeast to southwest 5 to 15 mph.

### HAZARDOUS MATERIALS ENCOUNTERS

Employees who may encounter hazardous materials in the field should be trained as mandated by OSHA 1910.120 (q), First Responder Awareness Level. However, employees should always recognize that hazmat encounters require special precautions.

● Hazardous materials in the field include, but are not limited to:

- Clandestine drug waste – waste as a result of “meth” labs, etc., which may look like common household trash at first glance. Drug lab waste can be identified by the presence of gallon plastic jugs, large plastic bags, 5-gallon buckets, and laboratory equipment (tubes and beakers).
- Midnight dumping – may be recognized by the presence of barrels or other containers, discoloration of land, plants, or water, and/or dead vegetation and animals.
- Transportation accidents – truck, rail, or pipeline accidents may result in the spillage or release of hazardous materials that may result in danger to life, property, or resources.

● In all instances, self-protection is your primary responsibility.

● Respond to all encounters by implementing the Three Rs:

- Recognize: Attempt to identify the substance using the North American Emergency Response Guide, occupancy/location, placards/labels, container shapes/colors, and/or MSDS shipping papers.
- Retreat: Move upwind, upgrade, or upstream; isolate the material; and deny entry to the site. Guidelines for isolation distances include: 150 feet for a minor incident (1 drum, 1 bag, etc.); 500 feet for a major incident (more than 1 drum, etc.); 300 feet for a residential and light commercial incident; 1,000 feet for an open area; 2,500 feet for an incident with BLEVE potential; 2,500 feet for the staging area (must be upwind with vehicles in a headed-out position)
- Report: Notify your supervisor and agency dispatcher. Request hazmat assistance via a safe route.
